## ANNUAL TRAA PADDLE & FISH

This year we be mixed it up a bit by having the Annual TRAA Paddle & Fish on Sharon Creek Reservoir. A thunderstorm threatened but only gave us a few minutes of rain to cool us off. Fish targeted were largemouth bass, crappie and other panfish as well as some bruiser carp...

### ABOUT THE TRAA

We are a "hands on" environmental group who likes to work at a grass roots level.

**WE PROTECT**

Our fishery, river fish, and environment

**WE PROMOTE**

Safe fishing practices, pollution control, and awareness

**WE PARTICIPATE**

In rehabilitation, environmental clean-up, and our community

[JOIN US](#)[LEARN MORE](#)

### OUR IMPACT

Our work is what sets the TRAA apart from other clubs and organizations. You'll find us right in the water clearing obstructions from streams, measuring returning salmonids & taking scale samples for DNA analysis, educating through trout hatchery tours & stream walks, being a voice for the Thames River watershed inhabitants...

The list goes on.

# WHO IS THE TRAA?

Hands-on Environmentalism is what we do.

## OUR MISSION

Protect, enhance and regenerate a viable, multi-species, year-round fishery.

Promote and participate in environmental clean-up, pollution control and rehabilitation.

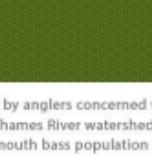

Breed, relocate and stock to re-establish or augment appropriate species of fish.

Form partnerships with community businesses, government agencies, special interest groups, landowners, and other stakeholders in the Thames River Watershed.

Promote environmentally sound sport fishing practices.

Increase public awareness of the unique diversity of the Thames River Watershed, its challenges, its recreational opportunities and its vital importance to our community.

## HISTORY

1986

The TRAA was formed by anglers concerned with the state of the fishery in the Thames River watershed, particularly the dwindling smallmouth bass population in the North Thames River. We began rearing rainbow trout in an outdoor upwelling incubation box.

2001

TRAA members start a 5-year Salmonid Tagging and Monitoring Program with personnel from the Upper Thames River Conservation Authority (UTRCA) and Jon George, an MNR biologist from Thunder Bay.

2010

The TRAA and the Upper Thames River Conservation Authority (UTRCA), with the blessing of the Ministry of Natural Resources (MNR), agreed to the operation of a walleye hatchery in Fanshawe Conservation Area, just north-east of London, Ontario.

2010

We continue to celebrate over 30 years of operation and are still involved in our community through educational tours of our trout hatchery, release programs, removing deadfalls from Komoka Creek, working towards our Brook Trout program and the decommissioning of the Spring Bank dam.
